RE: Notice of Intention to Commence
Exploratory Drilling
Sal Lease
Emery County, Utah
EXP/015/042

Dear Mr. Wilson:

Thank you for your May 7, 1980 letter concerning Kaiser Steel Corporation's proposed exploratory drilling project in Emery County, Utah. The letter satisfies the notice requirements of Rule M-3(5) of the Utah Mined Land Reclamation Act of 1975, Title 40-8, Utah Code Annotated. All information in the letter relating to the location, size, or nature of the deposit will be held as confidential material by the Division until written permission to release the information is received.

The Division requires no additional information at this time. However, a record of plugging procedures for each hole and general overall reclamation procedures (ie., grading, stabilization procedures, seed mixtures, rates, methods, and times of seeding) is required upon termination of operations. In addition, all information relating to water-bearing formations encountered in drilling and logging must be submitted to the Division in writing, and must give the hole location, and if possible, the depth of the water-bearing strata, the formation name, the rate of flow, and if known, the water quality.

If any operation or disturbances are to be conducted on State lands or mineral leases, then the Division of State Lands will need to be contacted 60 days prior to the commencement of operations.

Mr. Robert L. Wilson

Plugging guidelines are available upon request for your reference.

Thank you for your cooperation. When in the area a member of the Division staff will examine the site(s).

Sincerely,

for

THOMAS J. SUCHOSKI
ENGINEERING GEOLOGIST
